Ancient Greek playwright Euripides and information about one of his most important works ‘ELENI’

Student:Sifaki Joanna

Euripides was one of the greatest ancient Greek tragedians of the 5th century BCE, along with Aeschylus and Sophocles. He lived in Athens and wrote many important plays that focused on human emotions, the role of the gods, and the problems caused by war. One of his most known tragedies is 'ELENI'

‘ELENI’

- ‘ELENI’ is a tragedy by Euripides, an ancient Greek writer. The play tells a different story about Helen and the Trojan War. In this play, the real ‘Eleni’never went to Troy. The gods made a fake ‘Eleni’, and the real one stayed in Egypt.
- After the war, her husband Menelaus finds her in Egypt. Together they make a plan to escape and go back home. The play talks about war, truth, and how people can be fooled by lies.

Will the tragedy ‘Eleni’ be still so interested today?

- I think the tragedy ‘*Eleni’* by Euripides could still be interesting today. The play talks about war, lies, and how people can suffer because of things that are not true. These ideas are still important in the modern world, because even today wars and conflicts sometimes start because of wrong information or misunderstandings.
- The play also shows how people try to survive and make smart plans to escape from danger. This is something that people today can understand. For these reasons, the tragedy ‘Eleni’can still have meaning today and people could find it interesting even in our time.
